## Introduction

TV Basics has long been one of TVB's most popular publications. Here you will find information and statistics that will help you understand and navigate the increasingly complex multiplatform world in which we all operate. Local broadcast television stations have expanded their abilities to serve local marketplaces in a variety of ways that extend beyond their traditional on-air fare. They now provide digital subchannels, hyperlocal websites, local HD programming and mobile DTV to connect with viewers and to offer advertisers the synergy of local multiplatform advertising that reaches consumers at home, at work and on the go.

TV has come a long way since the 3 -channel days of the 1950s - and the complexity of the industry continues to increase. Now an informed observer of television must understand the impact of digital video recorders (DVRs), alternate-delivery systems (ADS), and cable vs. broadcast cumes. TV Basics can help.

Since the blizzard of statistics generated by the industry keeps coming, we now keep a cyber-edition of TV Basics on the TVB website updated regularly and ready to download whenever you need it.

We suggest you bookmark www.tvb.org for quick access to the most current data available. Don't see what you're looking for? Call us at 212-486-1111 or e-mail info@tvb.org... chances are, we can help!

TVB is the not-for-profit trade association of America's broadcast television industry. TVB provides a great variety of tools and resources to help advertisers make the most effective and efficient use of local and national spot television.

## Notes

Many tables in this booklet span 50 years. During that time many data suppliers have been bought, sold or merged. Also, many research techniques, gathering methods and time frames have changed. The "Sources" given here refer, in general, to the current source. If further clarification is needed for specific tables, please contact TVB's Research Department.

## Mobile Stats

Mobile Video Advertising, 2010 vs. 2015

Total
Local
National
© Copyright 2011 Borrell Associates Inc., Source: 2010R4, In \$ Millions

The number of U.S. mobile subscribers watching video on their mobile devices rose more than 40 percent year-over-year.

The growing popularity of mobile video is due, in part, to the rapid adoption of media-friendly mobile devices, including smartphones. Whereas in Q4 2009 only 23 percent of U.S. mobile subscribers had smartphones, by the end of 2010 smartphones penetration had reached 31 percent.

## Mobile Subscribers Watching Video on a Mobile Phone:

## Room Locations of TU Sets

The average American home is now equipped with a record number of television sets. The popularity of the flat screen has made it even easier to put televisions in non-traditional places. For the advertiser, this means an even greater opportunity to target the right audience at the right time.

The table below shows that 75\% of TV households have a set in the living room, while $27 \%$ of the sets in homes are in the living room.

| Living/front/sittingroom, parlor | \% TVHH with sets in the... | \% of total household TV sets |
| :---: | :---: | :---: |
|  | 75 | 27 |

## Time Spent Uiewing: Households

The time Americans spend viewing television has been growing steadily since the medium first emerged nearly 60 years ago. This growth was fueled by a variety of factors over the decades: multi-set and color TV households increased, the selection of 24-hour programming options expanded, and such technologies as the VCR and DVR gave viewers ever increasing control. By 2008, time spent viewing TV was at an all-time high.

| Annual Average | Time Spent Per Day |
| :---: | :--- |
| 1950 | 4 hrs. 35 mins. |
| 1955 | 4 hrs. 51 mins. |
| 1960 | 5 hrs. 6 mins. |
| 1965 | 5 hrs. 29 mins. |
| 1970 | 5 hrs. 56 mins. |
| 1975 | 6 hrs. 7 mins. |
| 1980 | 6 hrs. 36 mins. |
| 1985 | 7 hrs. 10 mins. |
| 1990 | 6 hrs. 53 mins. |
| 1995 | 7 hrs. 17 mins. |
| 1996 | 7 hrs. 11 mins. |
| 1997 | 7 hrs. 12 mins. |
| 1998 | 7 hrs. 15 mins. |
| 1999 | 7 hrs. 26 mins. |
| 2000 | 7 hrs. 35 mins. |
| 2001 | 7 hrs. 40 mins. |
| 2002 | 7 hrs. 44 mins. |
| 2003 | 7 hrs. 58 mins. |
| 2004 | 8 hrs. 1 min. |
| 2005 | 8 hrs. 11 mins. |
| 2006 | 8 hrs. 14 mins. |
| 2007 | 8 hrs. 14 mins. |
| 2008 | 8 hrs. 21 mins. |
| 2009 | 8 hrs. 21 mins. |
|  |  |

Source: The Nielsen Company, NTI Annual Averages, 1994-present estimates based on start of broadcast season September to September. Beginning in 2007, estimates include Live+7 HUT viewing. Prior to 9/87: Audimeter Sample; 9/87 to present: People Meter Sample.

## Time Snent Uiewing: Persons

Traditionally, women in TV households have spent the most time viewing television, averaging over 5 hours a day in recent years. Men are next, with over 4.5 hours of daily viewing since 2005. Teens and children have been viewing at about the same levels, nearing the 3.5 hour mark. In 2009, Men increased to 4:54. Women, still No. 1, increased to 5:31.
Teens went down to 3:26, and Children were up to 3:31.

| Annual Average | Time Spent Per Day |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Men | Women | Teens | Children |
| 1988 | 3:59 | 4:41 | 3:18 | 3:22 |

## Reach: Broadcast us. Cable

While cable penetration (wired and unwired) currently stands at approximately $90 \%$ of TV households, no individual cable network cumes to anything near that by the end of an average week. Not one cable network tops $40 \%$.

## Digital Cable

Nielsen estimates national digital cable penetration to be currently at 52.4\%.

## Alternate Delivery Systems: Local

While national ADS penetration was at $31.1 \%$ in Feb. '12, many markets have already reached, and passed, 40\%. It's important for local advertisers to know that ads inserted in local cable systems are not seen by viewers who get their programming from ADS.

## Top 50 sports Telecasts of All Time

Forty-one of the top 50 sports programs are Super Bowl games. In third place is the XVII Winter Olympics (2/23/94); this ratings spike can be attributed to the Harding/Kerrigan "incident."

| Rank | Program | Date | Network | HH Rating |
| :---: | :---: | :---: | :---: | :---: |
| 1 | Super Bowl XVI | 1/24/1982 | CBS | 49.1 |

## Network TU Activity By Length of Commercial

Originally the 60 -second commercial was the standard for the broadcast TV networks, a carry-over from radio days. By the mid-1960s the :30 was in use, first as a :30/:30 piggy-back, later as a stand-alone, and soon replaced the : 60 as the standard. While :15s grew rapidly in the late 1980s, their growth has slowed. They now comprise $39 \%$ of commercials, with : 10 s making up $1 \%$, and the newest 2009 addition :05s at just $0.1 \%$.

| NETWORKS |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Station TV Activity by Length of Commercial

While :60s dominated early on, :10s and :20s were part of the mix. By the mid-1970s, :30s accounted for about 80\% of total commercials; while still dominant, :30s have been on the decline and now account for 65.9\% of the total. The use of $: 10 \mathrm{~s}$ and $: 20 \mathrm{~s}$ have declined over the years while :15s have been rising slowly and now account for $20.4 \%$ of the total. The use of $: 60$ s currently stands at $7.7 \%$, while :10s comprise $3.6 \%$ and the latest 2009 addition, :05s, is at $1.4 \%$.

## 2011 Local Online Ad Revenues by Media Choice

Source: © 2012, Borrell Associates, Inc. All rights reserved.

## Local Station Website Strength

Local TV stations have been outpacing the overall growth in digital advertising. Estimates for last year's revenue for local broadcasters were $\$ 1.97$ billion, an increase of $41 \%$ over 2010. Forecasts for 2012 are continued robust growth of $35 \%$, to $\$ 2.7$ billion.

Source: © 2012, Borrell Associates, Inc. 2012-2016: forecast. All rights reserved.

## TV Stations Increasing Targeted Aduertising

Stations remain dependent on display advertising, although their dependence on "static" banner ads declined from $60 \%$ of all online ad sales in 2010 to 58\% last year. Targeted banner sales increased 66\% from 2010 levels for TV stations. Streaming video advertising sold by stations also increased, up 31\% from 2010 to $\$ 338$ million (with newspapers at $\$ 328.2$ million).

## Broadcast TV Stations Online Revenues

(\$ in millions)

| Untargeted Banners | $\$ 1,157.9$ |
| :--- | ---: |
| Targeted Banners | $\$ 228.8$ |
| Paid Search | $\$ 57.8$ |
| E-mail | $\$ 190.9$ |
| Streaming Video | $\$ 338.0$ |

## Political Outlook dy Program Type

Local broadcast news is one of the strongest television vehicles for reaching potential voters; for this reason, local news is always a key component of political ad buys. In addition, there are other program genres that warrant consideration; the following table is based on national data and highlights the key program types that attract people of various political persuasions.

|  | $\begin{gathered} \text { Very } \\ \text { Conservative } \end{gathered}$ | Somewhat Conservative | Middle of the Road | $\underset{\substack{\text { Liberal }}}{\text { Somewhat }}$ | $\begin{aligned} & \text { Very } \\ & \text { Liberal } \end{aligned}$ |

## Political Aduertising \& Government Regulation

Congress, the Federal Communications Commission and the Federal Election Commission regulate broadcast political advertising of candidates and issues. Regulation focuses on two principal areas:

Access: Only federal candidates have access rights. Stations must honor a federal candidate demand to purchase time.

Rates: Federal, state and local candidates receive a station's best rate for its most favored advertiser during pre-election periods (the "lowest unit charge"). Issue advertisers are not entitled to the lowest unit charge.
From these flow additional basic elements of broadcast political advertising: Equality: Any candidate may demand the same terms of a time buy that an opponent has purchased within the preceding seven days (the famed "equal opportunities" clause). Issue advertisers are not entitled to equal opportunities.
Placement: Television news is a sacrosanct safe harbor from access demands. News adjacencies must be made available, however.

Appearance: The right to the lowest unit charge is personal to a candidate, and therefore the candidate must personally appear in an ad to receive the lowest unit charge. Otherwise, comparable commercial rates apply.
Pre-Election: The lowest unit charge must be made available within 45 days of a primary and 60 days of a general election. At other times, comparable commercial rates apply.
Sponsor ID: A political ad must contain a "disclaimer" that meets separate FCC and FEC requirements.
Full service: Stations may charge usual and customary fees for services not related to the sale of time (e.g., production, talent, and distribution charges).
Cash: Stations may require cash up-front for political advertising, including issue advertising, if station policy requires cash up-front for new commercial advertisers.

Paperwork: Stations must document and make publicly available all requests and contracts for political advertising by anyone who wants to buy time for or against any candidate or on an issue of national importance. Separate FCC and FEC requirements apply.
Few areas of federal regulation are more arcane and complex than broadcast political advertising. TVB's desk reference, "Political Advertising Handbook For The Television Sales Executive," treats the subject in greater depth, and is available online, for TVB members only at www.tvb.org. Counsel should be consulted in a specific case.

## Consumer Media Usage

Today, more and more media are competing for people's time. Television remains the clear winner, more than doubling the No. 2 medium, Broadcast \& Satellite Radio.

## Geographic Targeting <br> Delivers Customers

There's never enough money to advertise everywhere you want for as long as you want. Which is why the media planner's basic task is allocation. That is, spending a limited resource for greatest total effect in getting people to buy the product.

It is the events in a person's life - the empty cereal box, the high telephone bill, the broken dishwasher, the expiring car lease - that trigger consumers to consider making a purchase. Most brand advertising does its job by being there with a message for the consumer who is ready to buy the product.

Thus, for most established brands, advertising has its greatest effect when a consumer is

## Nissan Maxima

For this sedan, the 31 high-indexing DMAs contained $25.7 \%$ of the U.S. population, but delivered over 51.4\% of all new Nissan Maxima registrations in $1 Q^{\prime} 10$.

"in the market." For that reason, when
a person gets a message is often more important than how many messages a person gets. And because products are bought every day, brands need to remind people of their name and value every day.

This is an argument for more weeks of advertising...continuous presence, in other words, not just frequency. These new ideas can be summed up in the phrase: recency planning.

Since purchases are made continuously, but we usually don't know who is ready to purchase, the idea is to talk to as many target consumers as possible. For most established brands today, the goal is "reach and continuity," not "reach and frequency." In other words, it's much more important to reach a potential customer when $s / h e$ is interested in making a purchase than to reach every viewer three times or more. And to do that it is necessary to advertise consistently over time. That's called recency.

Advertising does many things. Over time, it builds brand awareness in the target market which in turn makes it easier to influence the next purchase. Recency's real contribution to advertising is to focus on that next purchase - whether the brand is new or established, cornflakes or cars.

Both weeks and weekly reach are key recency goals. Unfortunately, most advertisers can't afford both. The traditional trade-offs for buying more weeks - scheduling fewer rating points, using 15 s instead of 30 s, and maximizing lower-priced programs - have been pushed to the limit. The remaining option is to focus on geography, not demography.

## Concentrating solely on demography produces targeting errors.

There are two kinds: "false positives" where the demo is not the target and "false negatives" where the target is not the demo.

False positive errors waste money. A high percentage of demo exposures are delivered to non-prospects. False negative errors distort GRPs and reach - a significant percentage of prospects are not in the GRP or reach calculations.

And there is no way to reduce the error when using demo targets. A larger demo, for example, merely increases false positives - it includes more people who are not the target. A narrower demo increases false negatives - it excludes more people who are the target.

Using geography, however, reduces targeting error by focusing on high response areas. That's why geo-targeting is so important.

Every brand has geographic areas of opportunity. These are spot markets where advertising is most likely to produce sales.

For most brands, markets comprising a third of the U.S. will have a BDI of 125 or higher. For example, on these pages, the high-indexing DMAs shown delivered approximately half of each model's new registrations. (The blue dots indicate DMAs with the highest concentration of

## Subaru Outback

For this sedan, the 52 high-indexing DMAs contained $23.5 \%$ of the U.S. population, but delivered $50.6 \%$ of all new Subaru Outback registrations in 1Q'10.
 purchasers relative to the national average.)

Geography combined with demography is the optimum formula for reaching high-potential consumers. This is the great strength of Spot TV.

## Top 25 African-American Markets

In total, the top 25 African-American DMAs contain 61\% of all AfricanAmerican TV households in the U.S. New York tops the list, with 1.28 million African-American households, followed by Atlanta, Chicago, Washington, DC and Philadelphia.

## Ethnic Buying Power

Hispanic, African-American and Asian target markets have made substantial gains in buying power* over the last decade. Each of these consumer groups have out-paced the total U.S. buying power growth rate since 1990.

| Buying Power (billions of dollars) |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
|  | $\mathbf{1 9 9 0}$ | $\mathbf{2 0 0 0}$ | $\mathbf{2 0 0 9}$ | $\mathbf{2 0 1 4}$ |
| African-American | 318.1 | 590.2 | 910.4 | $1,136.8$ |
| Hispanic | 211.9 | 489.4 | 978.4 | $1,330.4$ |
| Asian-American | 116.5 | 268.7 | 508.6 | 696.5 |
| Total | $4,270.5$ | 7,187.6 | $10,717.8$ | $13,097.1$ |
| Percentage Change in Buying Power |  |  |  |  |
|  | 1990-2009 | 1990-2014 | 2000-2009 | 2009-2014 |
| African-American | 186.2 | 257.3 | 54.3 | 24.9 |
| Hispanic | 361.8 | 528.0 | 99.9 | 36.0 |
| Asian-American | 336.6 | 497.9 | 89.3 | 36.9 |
| Total | 151.0 | 206.7 | 49.1 | 22.2 |

In 2014, African-Americans will account for $8.7 \%$ of all U.S. buying power, up from 7.4\% in 1990.
Compared to the total U.S., African-Americans spend more on:

- Telephone Services - Electricity

In 2014, Hispanics will account for $10.2 \%$ of all U.S. buying power, up from $5.0 \%$ in 1990.
Compared to the Total U.S., Hispanics spend more on:

- Groceries
- Telephone Services
- Housing
- Clothing

In 2014, Asians will account for $5.3 \%$ of all U.S. buying power, up from 2.7\% in 1990.

Compared to the average U.S. household, Asians spend more on:

- Food
- Housing
- Furniture
- Vehicle Purchases

[^10]
## Ethnic Buying Power

Top States for African-American Buying Power: The ten largest AfricanAmerican states account for $61 \%$ of the African-American buying power.

## Local News Delivers Qualify Uiewers

In every local broadcast market, there are opportunities to reach targeted consumers via programs that cater to local market nuances. Here are some examples of the different types of goods and services that over-index among news viewers in five DMAs.

| Category | Index of News Viewers against Total Market (Adults 18+) |
| :---: | :---: |
| Albuquerque, NM (Morning Local News) |  |
| Plan to buy a Smartphone in the next 12 months | 162 |
| Plan to purchase a poo/hot tub/home spa in the next 12 months | 150 |
| Went to a live show at a casino in the past year | 142 |
| Planning to buy a home security system in the next 12 months | 141 |
| Made an addition to home in the past year | 131 |
| Las Vegas, NV (Late Local News) |  |
| Business decision maker for overnight delivery services | 204 |
| Plan to buy a pool/hot tub/home spa in the next 12 months | 195 |
| Plan to purchase a computer in the next 12 months | 157 |
| Plan to purchase a digital computer in the next 12 months | 136 |
| Plan to purchase a smoking cessation product in the next 12 months | hhs 133 |
| Rochester, NY (Morning Local News) |  |
| Consulted with a plastic/cosmetic surgeon in the past 12 months | 170 |
| Purchased arthritis medication in the past 12 months | 134 |
| Used services of an attorney in the past 12 months | 124 |
| Purchased medication for high blood pressure in the past 12 months | hs 117 |
| Purchased medication for a digestive disorder in the past 12 months | hs 117 |
| San Francisco, CA (Late Local News) |  |
| Plan to purchase an eReader device in the next 12 months | 200 |
| Purchased medication for migraines in the past year | 150 |
| Plan to purchase an energy saving appliance in the next 12 months | S 139 |
| Plan to purchase a major appliance in the next 12 months | 127 |
| Took medication for weight loss in the past year | 124 |

Example: In Albuquerque, viewers of morning local broadcast news are $62 \%$ more likely than all Albuquerque adults to be planning to buy a Smartphone in the next 12 months.
Note: All M-F local broadcast affiliates and independent news programs are included in the news viewer definitions.

(Apr 2009 - Mar 2010 Alb \& LV; Feb 2009-Jan 2010 Rochester \& SF)

## Sales Distinctions by DMA

No goods or services sold in the U.S. have equal distribution throughout all 210 television markets. Some may have flatter patterns than others, but there are always market variations based on consumer lifestyles and interests.

Listed below are examples of television markets that have above average indices in three selected sales categories. Spot TV enables advertisers to target high indexing markets for greater ROI.

| DMA | $\mathbf{2 0 0 9}$ <br> DMA Rank | CDI |
| :--- | ---: | :--- |
| Gourmet Cooking/Fine Foods |  |  |
| San Francisco, CA | 6 | 132 |
| New York, NY | 1 | 124 |
| Miami, FL | 16 | 121 |
| Las Vegas, NV | 38 | 120 |
| Washington DC | 9 | 119 |
| Casino Gambling |  |  |
| San Francisco, CA | 6 | 113 |
| Miami, FL | 16 | 112 |
| Honolulu, HI | 62 | 110 |
| Baltimore, MD | 27 | 109 |
| Chicago, IL | 3 | 108 |
| Fashion Clothing |  |  |
| San Francisco, CA | 6 | 122 |
| New York, NY | 1 | 121 |
| Las Vegas, NV | 38 | 118 |
| Washington, DC | 9 | 117 |
| Miami, FL | 16 | 116 |

Notes: CDI, or Category Development Index, is derived by dividing a market's percentage of U.S. sales for a category by the market's percentage of U.S. population.
Source: SRDS Local Market Audience Analyst 2009; DMA Rank based on Nielsen DMA Rank, September 2009.

## Research 101 - <br> Television Markets

## DMA (Designated Market Area)

A Nielsen term used to identify an exclusive geographic area of counties in which the home market television stations hold a dominance of total hours viewed. Each county in the U.S. is assigned to only one of the 210 DMAs.

## Universe Estimate (U.E.)

Total persons or homes in a given population, e.g., TV households in the U.S. or in a specific DMA.

## Metered Markets

DMAs in which household viewing is measured by set-tuning meters in one panel of households, while demographic viewing is collected via diaries from a separate sample. Household viewing data is reported on an overnight basis.

## Local People Meter Markets (LPM)

Local markets with the same metering device used for national Nielsen data. The People Meter measures TV set-tuning and demographic data on a 52 -week basis, eliminating the need for diaries.

## Diary Markets

DMA viewing for both set-tuning and demographics is recorded in a paper television viewing diary. Diary markets are measured only during the "sweep" months. Demographics for metered markets are also obtained with diaries.

## Cable Teleuision Terms

## Coverage Area

The number or percentage of TV households that could receive an individual cable channel or program. Coverage reflects the ability to view, not actual viewing.

## Wired Cable Homes

The household is "wired" for cable via a wire to the home from a cable head-end located in the community, and can receive cable channels on any connected TV set in the home.

## Alternate Delivery Source (ADS)

Technologies for the delivery of cable channels that are alternatives to a wire going into the home: satellite dish (C-Band), Direct Broadcast Satellite (DBS), Satellite Master Antenna (SMATV) and Microwave Multi Distribution System (MMDS).

## Research 101 - <br> Media Terminology \& Formulas

## Rating

The audience of a particular program or network at a specific period of time expressed as a percent of the total audience population or universe.
For example, in a typical large DMA, a 12 NSI household rating would equal delivery of $885,160 \mathrm{HH}$ or $12 \%$ of a HH universe of $7,376,330$.
If a program has a 12 national (NTI) household rating, and the U.S. TV household universe is 114.5 million, then $12 \%$ of $114,500,000$, or $13,740,000$ households, are tuned to the program.

## FORMULA

Share (\%) x HUT (\%) = Rating
Audience ( 000 's) / Universe Estimate ( 000 's) = Rating

## Share

The percent of the Households Using Television (HUT) or Persons Using TV (PUT) which are tuned to a specific program or station at a specified time.

For example, a 12 household rating divided by a television usage level (HUT) of 60 would yield a share of 20 .

## FORMULA

Rating (\%) / HUT or PUT (\%) = Share
Note: Share is a percent of the viewing audience available during a specific time period. A rating is a percent of the universe estimate.

## HUT (Homes Using Teleuision)

The percent of all TV households with one or more sets in use during a specific time period. When this term applies to people, it is called Persons Using Television (PUT).
For example, HUTs in prime time are generally in the 60-65\% range while 7AM-9AM could be about $30-35 \%$.

## FORMULA

Rating (\%) / Share (\%) = HUT
HH with TV sets on ( 000 's) / Total HH Universe ( 000 's) $=$ HUT

## Research 101 -

## media Terminology \& Formulas

## Audience Composition

The percent that a specific demographic segment is of a larger demo segment. Usually calculated using either Persons $2+$ or Adults 18+ as the base, it can be calculated using either impressions or VPVHs.

## FORMULA

A25-54 (000) / A18+ (000) =
The A25-54 \% audience composition of Total Adults

## Cost Per Thousand (CPM)

Advertisers' cost to deliver one thousand viewer exposures to a commercial. The total cost for one or a series of commercials is divided by the projected audience in thousands.

For example, if the cost of a commercial is $\$ 50,000$ and the projected audience is $4,606,000$, then the CPM equals $\$ 10.86$ ( $\$ 50,000 / 4,606$ ).

## FORMULA

Media cost / Impressions in thousands = CPM

## Cost Per Rating Point (CPP)

An advertising cost to deliver a single rating point. CPP is calculated by dividing the cost of running a commercial by the size of the audience, expressed in rating points.

For example, if the cost is $\$ 50,000$ and the rating for a program is 12 , then the cost per point is $\$ 4,166.67$ ( $\$ 50,000$ divided by 12 ).

## FORMULA

Average unit cost / Rating (\%) = CPP
Total schedule cost / GRPs = CPP

## Uiewers Per Uiewing Household (UPUH)

The number of viewing persons per tuning household. Usually reported as "per 1,000 viewing households." VPVH is not a percentage, it is a ratio of a demographic segment to households and represents an actual number of people.

For example, if there are 13.5 million households tuned to a program and the Women 18-49 VPVH is .43, then there are . 43 W18-49 in each of these 13.5 million households.

## FORMULA

Persons Projection / Household Projection = VPVH

## Research 101 - <br> Media Terminology \& Formulas

## Reach

The number of different individuals or households exposed at least once to a program or commercial across a stated period of time. It is expressed as a percentage of a given universe. A household or person is counted once, no matter how many times the telecast has been viewed. Also called cumulative or unduplicated audience.

## FORMULA

GRPs (\%) / Frequency = Reach

## Frequency

Average number of times a household or person viewed a given television program, station or commercial during a specific time period. For instance, a schedule of 150 GRPs divided by the percent of homes reached (70\%) would deliver a frequency of 2.1.

FORMULA
GRPs (\%) / Reach (\%) = Frequency

## Reach \& Frequency Example

Schedule $=150$ GRPs
Total DMA Households = 10
Channel 2 HH News Viewing (M-F 6-7PM) $=7$ out of a 10 HH universe

*Household had no viewing to Channel 2 News

In this example, Ch. 2 News reach is 7 HH out of the DMA universe of 10 HH, or $70 \%$. Frequency is calculated by dividing the 150 GRPs by the $70 \%$ reach, yielding an average 2.1 frequency.

Each household exposure to the commercial is counted in the GRP total, but any duplication of viewing by the same household is eliminated in the reach calculation because each household is counted only once. Commercial XYZ has been seen in 7 out of 10 households an average of 2.1 times.

## Television Acronyms

Various industries all have their own unique language or nomenclature and the television advertising business is no exception. Listed below are some of the common acronyms that are used and what they stand for, followed by useful terms and definitions.

AAAA ..........American Association of Advertising Agencies
AAF ............American Advertising Federation
ADS ............Alternate Delivery Systems
AFTRA ........American Federation of Television and Radio Artists
AMOL..........Automated Measurement of Lineups
ANA ............Association of National Advertisers
ARF .............Advertising Research Foundation
AWRT ........American Women in Radio and Television
BDI ............Brand Development Index
CATV ...........Cable Television
CC ...............Closed Captioned
CDI .............Category Development Index
CNAD..........Cable National Audience Demographics Report
COLTAM......Committee on Local Television Audience Measurement
COLTRAM....Committee on Local Television and Radio Audience Measurement
CPM.............Cost Per Thousand
CPP ............Cost-Per-Rating Point
DBS .............Direct Broadcast Satellite
DMA ..........Designated Market Area
DTV .............Digital TV
DVD ............Digital Versatile Disk
DVR .............Digital Video Recorder
EBS ............Emergency Broadcast System
EDI ............Electronic Data Interchange
FCC .............Federal Communications Commission
FTC .............Federal Trade Commission
GAA ............Gross Average Audience
GRP .............Gross Rating Point
HDTV ..........High Definition Television
HUT .............Households Using Television
IRTS ..........International Radio \& Television Society Inc.
LCD .............Liquid Crystal Display
LMA .............Local Marketing Agreement
LPM ............ Local People Meter
LPTV ...........Low Power TV Station
MMDS ........Multi-channel Multi-point Distribution System
MSO.............Multi-System Operator
MVPD ........Multichannel Video Programming Distributor

## Glossary of Teleuision Terms

## A

## Ad Hoc Metwork

A group of stations that is formed for a special purpose, such as the showing of a one-time TV program or series. Ad hoc is Latin for "for this."

## Adjacency

A commercial or program that immediately follows or precedes another on the same TV station.

## Aduertising Weight

A measure of advertising delivery, normally stated in terms of number of commercials, homes reached, target audience impressions, and gross rating points.

## Affidauit

A notarized statement from a television station that confirms the commercial actually ran at the time shown on the station's invoice.
Affiliate
A TV station, not owned by a network, that grants a network use of specific time periods for network programs and advertising, often for compensation. Remainder of broadcast day is programmed locally.

## Alternate Deliuery Systems (ADS)

TV homes with unwired cable access are referred to as having Alternate Delivery Systems. The four components of ADS are:

- Direct Broadcast Satellite (DBS): Programming delivered directly via household's own small (usually $18{ }^{\prime \prime}$ ) dish; DBS is the largest component of ADS.
- Satellite Master Antenna (SMATV): Serves housing complexes and hotels; signals received via satellite and distributed by coaxial cable.
- Microwave Multi Distribution System (MMDS), "Wireless Cable": Distributes signals by microwave. Home receiver picks up signal, then distributes via internal wiring.
- Satellite Dish (C-Band/KU Band), "Big Dish": Household receives transmissions from a satellite(s), via a 1- to 3-meter dish.

## Audience Composition

The distribution of a station's audiences by demographic group.

## Audience Duplication

The extent to which the audience of one station is exposed to that of another.

## Audience Flow

A measure of the change in audience during and between programs. Audience flow shows the percentages of people or households who turn on or off a program, switch to or from another channel, or remain on the same channel as the previous program.

## Automated Measurement of Lineups (AMOL)

The technology which allows The Nielsen Company to track an identification code within locally transmitted TV signals for network and nationally syndicated programs. Nielsen is also linked by computers to networks and syndicators in order to receive their latest schedule changes. Using this technology, Nielsen can pin down exactly what program was shown on what channel at a particular time.

## Auerage Audience (AA)

A widely used rating term, expressed as a percentage, to reflect viewing to the average minute of a program or time period. It is an average of the audience at minute $1,2,3$, etc. As such, it serves as an estimate of the average commercial audience (households or persons).

## Auerage Quarter-Hour Audience

Estimated number of people who watch a program or station for a minimum of five minutes within a specific quarter hour.

## $B^{1 /}$

## Back Channel

A means of communication from users to content providers. As content providers are transmitting interactive television (analog or digital) to users, users can connect through a back channel to a website. It can be used to provide feedback, purchase goods and services, etc.

## Barter

The exchange of quantities of commercial time for merchandise or services.

## Barter Syndication

A program distribution method in which the syndicator retains and sells a portion of the show's advertising time. In "cash plus barter," the syndicator also receives some money from the station on which the program airs.

## Basic Cable

Channels received by cable subscribers at no extra charge, usually supported by advertising and small per-subscriber fees paid by cable operators.

## Billboard

A brief announcement, usually 3,5 or 10 seconds in length, and usually earned by advertisers paying extra for the program being ordered. Billboards are afforded, in most instances, at the top and bottom (beginning and end) of the show. The product and/or sponsor's name is mentioned in a statement such as "...the following portion of (program) is being brought to you by (sponsor)..." Also, called OPEN when used at the top of a show, and CLOSE when used at the bottom of a show.

## Brand Development Indek (BDI)

A measure of the relationship of a specific brand's sales to population in a specific geographic area. The BDI is derived by dividing an area's percent of total U.S. sales by that area's percent of population.

## Broadband Sepuices

High-speed cable Internet, digital cable and digital phone services all through a single pipeline.

## Broadcast Calendar

The standard Broadcast calendar, created in the 1960s, is designed to conform to the uniform billing period adopted by broadcasters, agencies and advertisers for billing and planning functions. Under this system, the standard week starts on Monday and ends on Sunday. The standard Broadcast billing month always ends on the last Sunday of the calendar month.

## Broadcast Coverage Area

The geographic area that receives a signal from an originating TV station.

## G

## Cable Teleuision (Cable TU or CATU)

A television distribution system whereby TV signals are transmitted via cable (insulated wire), rather than through the air, to subscribers in a community or locality. Cable television systems are generally called cable systems; the companies that own and operate them are known as cable system operators or cablecasters.

## Category Development Indek (CDI)

A measure of the relationship of a specific category's sales to population in a specific geographic area. The CDI is derived by dividing an area's percent of total U.S. sales by that area's percent of population. Comparing BDI and CDI can be helpful in gauging brand or category potential.

## Clutter

Excessive amounts of advertising carried by media vehicles. Term refers to the total amount of advertising time and space and to its scheduling long strings of consecutive commercials for broadcasting.

## Confirmation

A statement (verbal or written) given to advertising agencies by a network, station, or rep firm when accepting an order for a commercial and/or media schedule.

## Continuity

Scheduling advertising consistently over a period of time without interruption in order to build or maintain advertising awareness and recall.

## Co-op Aduertising

TV advertising paid for jointly by a manufacturer and retailer.

## Cost-Per-Rating Point (CPP)

Used by most media planners in developing and allocating market budgets and setting rating point goals. It is defined as the cost of reaching one percent of the target audience within a specified geographic area.
$\frac{\text { Average Cost per Spot }}{\text { Average Rating Point per Spot }}$ OR $\quad \frac{\text { Cost of Schedule }}{\text { Gross Rating Points }}$

## Cost Per Thousand (CPM)

The cost of reaching 1,000 homes or individuals with a specific advertising message. CPM is a standard advertising measure to compare the relative cost efficiency of different programs, stations, or media.

## Coverage

The percentage of homes or persons receiving a particular broadcast signal within a specific geographic area.

## Cumulative Audience (CUME)

It is the total non-duplicated audience for one or a series of telecasts, programs, messages, or time-periods. It is expressed as a percentage of a given universe. A household or person is counted once no matter how many times the telecast has been viewed. This also is known as reach, net unduplicated audience, or net reach.

## $\mathrm{D}^{1 /}$

## Datacasting

The broadcast of information and other services using a digital television channel. Broadcasters can offer additional related information while a program is being viewed.

## Dayparts

The time segments that divide the TV day for ad scheduling purposes. These segments generally reflect a television station's programming patterns. Comparison of audience estimates between dayparts may indicate differences in size and composition of available audience. While dayparts may vary by market, station and affiliation, the most common dayparts* are:

## ...Dayparts continued

Early morning 5:00am-9:00am
Daytime $\quad$ 9:00am-3:00pm
Early fringe $\quad 3: 00 \mathrm{pm}-5: 00 \mathrm{pm}$
Early news $\quad$ 5:00pm-7:00pm
Prime access 7:00pm-8:00pm
*Eastern Time
Decoder
An electronic device used for converting a scrambled TV signal into a viewable picture.

## Demographics

Audience composition based on various socioeconomic characteristics such as age, sex, income, education, household size, occupation, etc.

## Designated Market Area (DMA)

Represents an exclusive geographic area of counties in which the home market stations are estimated to have the largest quarter-hour audience share (as defined by Nielsen).

## Digital Television (DTU)

Generic term that refers to all digital television formats, including highdefinition television (HDTV) and standard-definition television (SDTV).

## Digital Uideo Recorder (DUR)

Refers to "digital video recorder," also known as "personal video recorder." A DVR or PVR records broadcasts on a hard disk drive which can then be played back at a later time (this is known as "time shifting"). A DVR often enables smart programming, in which the device records an entire series or programming defined by keywords, genre, or personnel; and offers pause control over "live" broadcasts.

## Discrepancy

A difference between station billing and the original order; requires a discussion between the buyer and the station before the invoice is paid.

## Direct Broadcast Satellite (DBS)

A television technology that delivers signals directly from a satellite to a home through the use of a small (usually $18^{\prime \prime}$ ) dish.

## Direct Response

Advertising that seeks direct and prompt response from the viewer by means of exhibiting telephone numbers, box numbers, or other means of getting the viewer to order or inquire about objects shown.

## Drop-In Ad

A local commercial inserted into a national program, or, more generally, an advertising message inserted into a larger advertisement, as for a local dealer or retailer, or a phrase, such as a public service slogan, or symbol; also called a hitch-hike ad.

## Duopoly

An instance where two stations in the same designated market area are owned by the same party. Though once forbidden by the FCC, the rules surrounding duopolies have been relaxed in recent years.

## E

Electronic Data Interchange (EDI) See definition under eBusiness.

## Efficiency

The relationship of media cost to audience delivery.

## eBusiness

The transfer of data from one computer to another. When computers connect, trading partners can conduct business transactions electron- ically. eBusiness promises a more efficient procedure for processing Spot TV buys electronically.

## Equal Time

The FCC's Equal Opportunities Rule (part of Section 315 of the Communications Act) states that if a broadcast station or cable system gives or sells time to one candidate for public office, it must offer equivalent time to other candidates. News shows are exempt.

## ExDOSure

A person's physical contact with an advertising medium or message.
It can be in a visual and/or an audio form.

## Flight

A scheduling tactic that alternates periods of advertising with periods of no activity.

## Fragmentation (Audience)

The increasing number of audience subdivisions which, together, constitute total TV usage. Television audiences are said to be fragmented, for example, across a broad spectrum of video sources: multiple broadcast networks, cable networks, syndicated programs, DBS services, VCR and video game usage, Internet usage, etc.

## Frequency

The average number of times an accumulated audience has the opportunity to be exposed to advertisements, a particular program, or program schedule, within a measured period of time.

$$
\text { Reach } x \text { Frequency }=\text { Gross Rating Points }
$$

## ${ }^{\prime}$

## Geographic Targeting, or Geo-Targeting

The process of identifying a brand's geographic areas of opportunity, or the markets (DMAs) in which advertising is most likely to produce sales. Geographic targeting combines demographic and sales data to reach high-potential customers. See pages 64-67 for more information.

## Gross Rating Points (GRP)

The sum of individual telecast ratings on a total program basis or advertiser commercial schedule, without regard to duplication. For example, 10 announcements each with a 10 rating would produce a total of 100 GRPs.

## H

Hiatus
Period in a campaign when an advertiser's schedule is suspended for a short period of time, after which the schedule resumes.

## High Definition Teleuision (HDTU)

One mode of operation of digital TV whereby the broadcaster transmits a wide-screen picture with many times more detail than is contained in current analog television pictures. HDTV has 1125 lines of resolution vs. NTSC signals which have 525 lines of resolution.

## Households Using Television (HUT)

The percentage of all television households in a survey area with one or more sets in use during a specific time period.

## I'

## Impressions

Number of homes or individuals exposed to an advertisement or group of advertisements.

## Independent Station

Stations not affiliated with any network, usually refers to commercial stations only.

## Infomercial

A television commercial that is similar in appearance to a news program or talk show format, usually 30 minutes in length.

## Interactive Teleuision

A combination of television with interactive content. Programming can include richer graphics, one-click access to websites through TV Crossover Links, electronic mail and chats, and online commerce through a back channel.

## Interconnect

Two or more cable systems distributing a commercial signal simultaneously, and offering a multiple system buy in which only one contract need be negotiated. Interconnects can be hard, where systems are directly linked by cable, microwave relays or by satellite, and the signal is fed to the entire Interconnect by one head-end; or soft, where there is no direct operational connection between the participating systems.

## $L^{1 /}$

## Lead-In

A program that immediately precedes another program on the same station or network. (Lead-out is the program that immediately follows another program.)

## Líve Ratings

The Nielsen Company's term for ratings reported as strictly live with no DVR playback activity.

## Live Plus Ratings

The Nielsen Company's term for live ratings plus seven-day DVR playback activity.

## Live PIus Same Day Ratings (Same Day Ratings)

The Nielsen Company's term for live ratings plus DVR playback activity until 3:00 am of the same Nielsen day.

## Local Marketing Agreement (LMA)

An agreement between two owners in which one markets and sells advertising for the other.

## Local Spot

The advertising purchased in a market and aimed only at the audience in that market (see Spot TV).

## m

## Make-good

A spot offered by a station in place of a regularly scheduled announcement that did not run or was improperly aired.

## Media Mix

The distribution of time and money allocated among TV, radio, print and Internet advertising that makes up the total advertising budget of an advertiser, agency or media buyer.

## Metro Area

A U.S. Government definition; the counties that comprise each Standard Metropolitan Statistical Area.

## Multichannel Uideo Programming Distributors (MUPDs)

A multichannel video program distributor is an entity such as a cable operator, a BRS/EBS provider, a direct broadcast satellite service, a television receive-only satellite program distributor, or a satellite master antenna television system operator, that makes available for purchase, by subscribers or customers, multiple channels of video programming.

## Multicasting

Broadcasting several programs at once via DTV on a single channel. A viewer might be able to receive two programs at the same time, and choose the program preferred.

## IV

## National Spot

A form of broadcast advertising in which national advertisers, through their agency or buying service, select their target markets and stations to fit their marketing needs. The station usually has a contract with a rep firm to represent it to ad agencies (see Spot TV).

## Network

A connecting system which allows simultaneous telecasting of a single origination by a number of stations.

NTSC
National television system committee. The organization that developed the analog television standard currently in use in the U.S., Canada, and Japan. Now generally used to refer to that standard. The NTSC standard combines blue, red, and green signals modulated as an AM signal with an FM signal for audio.

## 0

O\&O Station
A television station owned and operated by a national network.

## Optimization

Term used for a method of media planning using computer programs that develop the optimum media mix to spend advertising dollars most effectively. These media modeling systems allocate using media audience and cost data for all measured media vehicles plus the brand's requirements in terms of budget, target audience, reach \& frequency goals and other factors. Television optimizers identify the combination of programs, dayparts and stations that will optimize reach at the lowest cost.

## P'

## Pay-Pep-Uiew TU (PPU)

A system in which payment is made for a single showing of a program. Subscribers of the pay-television company can phone in their "orders" prior to a showing, activate the system - that is, clear the scrambled channel - or press a button to utilize two-way equipment that activates the system.

## Pay Teleuision (Pay TU)

Home television programming for which the viewer pays by the program or by the month; also called pay television, subscription television (STV), or toll TV. Pay television includes over-the-air transmission (with scrambled signals) and cable transmission (pay cable).

## Penetration

A proportion of households owning televisions or subscribing to cable.

## Personal People Meter (PPM)

Arbitron's PPM is a pager-sized device that is worn by consumers throughout the day to automatically detect inaudible codes that radio and television broadcasters and cable networks embed in the audio portion of their programming.

## Personal Uideo Recorder (PUR)

See definition under Digital Video Recorder (DVR).

## Persons Using Teleuilsion (PUT)

A measurement of the total number of people in the target audience who are watching television for five minutes or longer during an average quarter-hour. PUT is generally expressed as a percent.

## Pigguback

The back-to-back scheduling of two or more brand commercials of one advertiser in network or spot positions.

## Pod

A group of commercials, promos or announcements contained in a television program break.

## Post Buy Analysis

An analysis of schedule performance after it runs; offers a means of measuring a media buy as run versus its goal or original estimate of achievement.

## Pre-emption

An omission of an announcement from a previously confirmed broadcast schedule; the advertiser is either offered a make-good or takes a credit.

## Psuchographics

Audience analysis on the basis of psychological factors such as lifestyles, values and interests and how they affect purchase behavior.

## 0

## Quarter Hour Audience

Individuals viewing a station at least five minutes in a specific 15-minute period.

## $i^{1 /}$

Rating
A percentage of total households or population owning TVs who are tuned to a particular program or station at a specific time (e.g., a six rating for women 18-49 means 6 percent of all women 18-49 in the defined geographic area were viewing that station or program).

## Rating Point

A value equal to one percent of a population or universe.

## Reach

The number of unduplicated households or people exposed to a program, group of programs or an advertiser's schedule over a specific time period.
Reach x Frequency $=$ Gross Rating Points

## Rep Firm

Media sales representation company with offices in major advertising centers which represents stations in various markets for national advertising sales.

## Rotation

Scheduling of advertising in the same program or time period on different days each week (horizontal rotation) or throughout a particular day (vertical rotation) in order to increase advertising exposure to different prospects.

## Run-Of-Schedule (ROS)

Scheduling of commercials at any time of a station's choosing.

## Road Blocking

The scheduling of a brand's commercial at approximately the same time on all networks, or all stations in a given market.

## ${ }^{\prime \prime}$

## Satellite Station

A station that has agreed to rebroadcast the transmission of another station (generally operating in a larger nearby market) to an area that cannot otherwise be served by that station.

## Saturation

The concentration of a heavy amount of advertising in a short period of time in order to attain maximum reach.

## Scatter Plan

Scheduling method where the advertiser's commercials are rotated among a broadly described group of programs and/or time periods.
The advantage is that the advertiser gains a greater net audience (reach); the disadvantage may be that the station may include less attractive spots/commercial units in the schedule.

## Schedule

A listing of the time of day and dates an advertiser's commercials are planned to run.

## Set-top bok (STB)

These receivers (named because they typically sit on top of a television set) convert and display broadcasts from one frequency or type - analog cable, digital cable, or digital television - to a standard frequency (typically channel 3 or 4) for display on a standard analog television set.

## Share

The percent of households (or persons) using television who are tuned to a specific program, network, or station at a specific time.

## Spill-In

The penetration of a television signal transmitted from outside the market area.

## Spill-Out

The transmission of a television signal beyond its own market area.

## Sponsorshilp

The purchase of all or part of a television program by one advertiser.

## Spot TV

The advertising time purchased from individual stations. There are two major types: local and national. Local spots are purchased in one market and aimed only at the audience in that particular market. National spots are bought by national advertisers in several markets.

## Standard Definition Teleuision (SDTU)

An alternative method of operation for digital television that offers the opportunity to transmit two to eight standard quality programs in place of - but in the same channel as - that used for HDTV. By employing higher compression ratios, more programs may be transmitted.

## Standard Error

A measure of the margin of error in a survey result attributable to sampling.

## Strip

Refers to a television program aired five days a week, mainly Monday-Friday.

## Subscription Teleuision

See definition under Multichannel Video Programming Distributors.

## Superstation

A station that provides satellite transmission of its signal to cable systems throughout the country. The extended coverage allows the superstation to claim increased viewership.

## Sweeps

Ratings surveys in which local markets are simultaneously measured by a rating service (see page 46).

## Syndicated Program

A program that is produced for national distribution, but which is shown on individual local stations rather than on a national network is called a syndicated program. These programs may be sponsored either locally or nationally.

## Target Audience

The audience most desired by advertisers in terms of potential product/service usage and revenue potential.

## Teleuision Households

An estimate of the number of households that have one or more television sets.

## Total Audience

Percent of households tuning to all or to any portion of a program for at least 6 minutes.

## Total Survey Area (TSA)

A geographic area term; includes metro area and any additional counties where a statistically significant amount of viewing can be attributed to stations originating in the metro area. These outlying counties may well be a part of an adjacent metro area or DMA.

## U

## Ulitra High Frequency (UHF)

An area of the broadcast spectrum that carries television signals for stations with channels 14 through 83.

## Universe Estimate (UE)

The population chosen for a research study. The estimated number of actual households or people from which the sample will be taken and to which data will be projected.

## Upiront

The first selling wave for the broadcast or cable networks, and syndication. It usually occurs in the spring after the new fall schedules have been announced and presented to major advertisers. The commercial time not sold in the upfront is sold later in the season in the scatter market.

## ${ }^{\prime \prime}$

## Uery High Frequency (UHF)

An area of the broadcast spectrum that carries television signals for stations with channels 2 through 13.

## Uideo On-Demand (UOD)

Allows VCR-type control of broadcast or cable programs, or video and movies offered on a PPV basis.

## Viewers Per Uiewing Household (UPUH)

The number of viewing persons per tuning household; usually reported as "per 1000 viewing households."

## UiP (Uiewers in Profile)

The local television ratings book from The Nielsen Company, issued after sweeps periods for each of the 210 television markets in the U.S. (see page 46).

## w'

## Weighted Auerage

A statistical quantity calculated by multiplying each value in a group by an assigned weight, summing these products and dividing the total by the sum of the weights.

## Wraparound Commercial

A commercial with noncommercial material wrapped around it, such as a question about a past sports event at the beginning and the answer at the end; sometimes called an insert, as when it is inserted within a movie surrounded by questions about the movie.

## Glossary of Multiplatiofm Terms

## A

## Ad Server

A system used to determine which ads to serve based on the priority of an ad. It is also responsible for pacing the campaign, tracking and reporting on impression delivery and click-thru rates.

## Atlas

An ad server used by advertisers and agencies to create and track ads.

## Banner

In the ad industry, this is generally associated with the $468 \times 60$ size ad.

## Blog

Blog is short for weblog. A journal (or newsletter) that is frequently updated and intended for general public consumption. Generally representative of the personality of the author or the website.

## Bluetooth

Bluetooth is a computing and telecommunications industry specification that describes how mobile phones, computers and PDAs can easily interconnect with each other and with home and business phones and computers using a short wireless connection.

## A'

## Click Command

A unique URL placed in front of a "raw" URL, which enables the system that created it to track the click activity.

## Compression

The process of reducing the size of a media file by eliminating data. Higher compression means that the compression utility defines greater amounts of data as redundant. This can lead to loss of image quality, but highly compressed images can be delivered more efficiently over a network.

## converter Bok

An electronic device that hooks up to an analog television set and its over-the-air antenna. The box converts the digital TV signal into analog, making the signal viewable on an analog TV. Any analog TV set that currently receives free OTA programming via an antenna will need a DTV converter box to continue to receive television service after February 17, 2009.

## Cost Per Action (CPA)

A cost model incurred based on a user taking some specifically defined action in response to an ad. Examples of actions include sales transaction, customer acquisition or registration.

## Cost Per Click (CPC)

A cost model incurred every time a user clicks on an ad.

## Cost Per Lead (CPL)

A cost model incurred every time a user provides specific data to be used by the advertiser as a sales lead.

## Click-Thru Rate (CTR)

The ratio of ad clicks to ad impressions.

## I

Deck
The portal screen on a wireless phone where the wireless carrier places links to content.

## E

Euent
Any logged or recorded action that has a specific date and time assigned to it by either the browser or server. The occurrence of an event can be counted in three ways:
Event: Each occurrence of the event is counted; Visit: Each visit where the event occurs at least once is counted; Visitor: Each unique visitor that executed the event at least once is counted.

## F'

## Floating Ads

An ad that appears within the main browser window on top of the web page's normal content, appearing to "float" over the top of the page.

## Fold

A term to describe content placement on a page. The fold is the part of the screen that divides what can be seen initially (above the fold) from the content that is only visible by scrolling down (below the fold).

## H

## Hyperlink

A text or graphic link which redirects the user to a new URL or web page when the individual clicks on the link.

## I'

## IPTU (Internet Protocol Television)

Television and/or video signals are distributed to subscribers or viewers using a broadband connection over Internet Protocol.

## L"

## Landing Page

A web page where a user is taken upon clicking an ad.

## Leaderboard

A horizontal ad unit that measures $728 \times 90$ pixels.

## ${ }^{\prime \prime}$

## Message Unit

An ad unit that measures $300 \times 250$ pixels.

## Microsilte

A custom website designed specifically for an advertiser.

## Mobisode

Mobisode is a media industry term for a broadcast television episode specially made for viewing on a mobile telephone screen and usually of short duration.

## 0

Opt in
A direct, pro-active request by an individual recipient to have their email address or mobile phone number added to a specific mailing list. Advertisers are offering opt-in mobile updates such as coupons, entertainment options and restaurant reservations for mobile phone users.

## P'

## Page-takeover

An ad that prohibits a user from viewing content on web page until the ad is complete or closed.

## Page Uiews

A statistic used to count web pages seen by users.

## Portal

A website that often serves as a starting point for a web user's session. It typically provides services such as search, directory of websites and others such as stock quotes, email or message boards.

## Pull

Term used to describe how a wireless subscriber obtains content when they ask (i.e., pull) content to themselves.

## Push

Term used to describe how a wireless subscriber obtains content when they don't specifically ask for it each time.

## $\mathrm{a}^{\mathrm{K}}$

## Rich Media

A type of ad that incorporates animation, sound, video and/or interactivity. It can be used either singularly or in combination with technologies like streaming media, sound and Flash. It is deployed via standard web and wireless applications.

## s

## Skyscraper

A vertical ad unit that measures $160 \times 600$ or $120 \times 600$ pixels.

## Share-of-Voice (SOU)

A ratio of impressions bought to the total impressions available on a website.

## Social Networking

Web sites that allow people to link to others to share opinions, insights experiences and perspectives, whether it's music fans on MySpace, business contacts on LinkedIn, or classmates on Facebook. Many media sites have adopted social networking features such as blogs, message boards, podcasts and wikis to help build online communities around their content.

## II

## Unique Uisitor

A unique individual or browser who visits a website at least once for a specific time period. If that individual visits more than once during that time period, he/she is counted as one unique visitor. Unique visitors can be identified by user registration or cookies.

## 2012 Survey Dates

| Survey | Survey Dates | Markets |
| :--- | :--- | :--- |
| January | January 5-February 1 | 28 Markets (4 wks) |
| February | February 2-February 29 | 210 Markets (4 wks) |
| March | March 1-March 28 | LPM Markets Only (4 wks) |
| April | March 29-April 25 | LPM Markets Only (4 wks) |
| May | April 26-May 23 | 210 Markets (4 wks) |
| June | May 31-June 27 | LPM Markets Only (4 wks) |
| July | June 28-July 25 | 207 Markets (4 wks) |
| August | July 26-August 22 | LPM Markets Only (4 wks) |
| September | August 23-September 19 | LPM Markets Only (4 wks) |
| October | September 27-October 24 | 30 Markets (4 wks) |
| November | October 25-November 21 | 210 Markets (4 wks) |
| December | November 29-December 26 | LPM Markets Only (4 wks) |

[^12]
## Broadcast Calendar

This standard broadcast calendar, created in the 1960s, is designed to conform to the uniform billing period adopted by broadcasters, agencies and advertisers for billing and planning functions. Under this system, the standard week starts on Monday and ends on Sunday. The standard broadcast billing month always ends on the last Sunday of the calendar month.
